

# MANGROVE PLANTATION

## MOBILIZE LOCALLY TO PROTECT ARABLE LANDS

● Project launched

### KEY MESSAGES

**Description:** Largest mangrove restoration project worldwide with strong mobilization of local communities. The mangroves enable to protect and gradually desalinate coastal agricultural lands, favor the reinforcement of **fishing resources and carbon capture in the soils**

**Specificity:** Mobilization of local populations around plantation

**Impact:** +80 million trees planted

### LEVERS

- SOILS
- AGRICULTURAL WATER
- RISK MANAGEMENT
- FINANCING

Illustration: plantation of rhizophora, a mangrove species

### FUNCTIONING

#### THE VIRTUOUS CIRCLE OF MANGROVE PLANTATION

### SCOPE

SENEGAL

100 000 local tree planters

### BUDGET

€ 4 M  
over 20 years

### IMPACTS

**Agricultural productivity**  
~80 M of trees planted  
over more than 10 000 hectares

**Climate change**  
+1 Mt of CO2 captured

**Sustainable dev. goals**  
Development of terrestrial  
and water ecosystems

### PLAYERS

#### Donors

#### Partners

### NEXT STEPS

Extension of the program to more hectares of mangroves  
Involvement of more local players
